

DOUBLE ARBOR MULTIRIP SAW DRAG-250

QUALITIES

- Reliability, accuracy and ease of use
- Double arbor construction to process material thickness up to 150 mm.
- Heavy-duty material feed and gripping construction with a driven chain and 10-roller mechanism.
- Automatic material thickness control

WORK MATERIAL (mm)

| | |
|-----------|-----------|
| width | 60-250 |
| thickness | 40-150 |
| length | 1000-4000 |

READY MATERIAL (mm)

| | |
|-----------|-----------|
| width | 40-150 |
| thickness | 14-50 |
| length | 1000-4000 |

TECHNICAL CHARACTERISTICS

| | |
|---------------------------------|-------|
| Saw disk diameter (mm) | 250 |
| Total capacity (kW) | 84 |
| Feed speed (m/min) | 10-40 |
| Working shaft diameter (mm) | 70 |
| Chip suction pipe diameter (mm) | 250 |

OVERALL DIMENSIONS (m)

| | |
|--------|-----|
| length | 2.6 |
| width | 2.2 |
| height | 1.5 |
